### Hospital cover

#### Important information:

- Waiting periods, including those for pre-existing conditions, may apply.
- After payment of your excess (if applicable), 100% cover is available for all public and more than 520 private hospitals across Australia. You may have out-of-pocket costs if you are admitted to a hospital that does not have an agreement with onemedifund. To find your nearest agreement hospital, visit [www.onemedifund.com.au/providers](http://www.onemedifund.com.au/providers).
- Prostheses – we pay the benefit listed on the Government's Prostheses List. If your doctor charges above that amount, you will have out-of-pocket costs.
- We are unable to pay benefits for services that are not eligible for Medicare benefits.

## Access Gap cover

The Access Gap scheme aims to reduce your out-of-pocket costs for doctors' bills while you're in hospital. If your doctor chooses to participate, you will have:

- No gap
- or
- Known gap – where you will be told your exact out-of-pocket costs before you are admitted to hospital

We have Access Gap arrangements with over 36,000 doctors across Australia, so remember to ask your doctor if they will participate.

## Hospital substitution options

Our hospital substitution options allow you to recover where you're most comfortable – all you need is a referral from your treating doctor.

**Hospital @ Home** allows you to have services you would usually receive in hospital (like wound care or IV antibiotics) at home. If the healthcare services you need can be provided at home, you may be able to avoid a hospital stay altogether.

**Rehab @ Home** allows you to recover in the comfort of your own home with short term therapy for joint replacements, fractures, spinal conditions, stroke, respiratory conditions, cardiac conditions and mobility problems. We offer physiotherapy, occupational therapy and more.

Like all hospital services, there is a 12 month waiting period for pre-existing conditions for these options.

## Health programs

These programs are designed to help you keep your health on track.

**My Health Online** gives you access to a range of health and wellbeing tools through our My Health Online web portal. You can store health information and share it with your doctor, keep a calendar of healthcare appointments, access a health library and more.

**Health Risk Assessment** helps you discover more about your health. The online questionnaire gives you a health report showing where you are doing well and where we may be able to help.

**Strive for Health** has been developed to assist contributors with chronic conditions manage their health with the help of expert telephone or face to face support at home.
