It is not necessary that you or your doctor knew what your condition was or that the condition had been diagnosed. A condition can still be classed as pre-existing even if you had not seen your doctor about it before commencing Hospital cover or upgrading to a higher Hospital cover. Note: This waiting period applies to Hospital cover only, and does not apply to Extras cover.

Please note:

- Waiting periods will be waived for contributors transferring from another fund provided that:
 - the previous cover was an equivalent or higher level
 - the previous cover was financial at the time of transfer
 - waiting periods have been served with that fund
- If your previous level of cover was lower than your new level of cover, you will only be able to claim the lower benefits until waiting periods have been served.
- If annual limits have been used at the time of transfer you won't be able to claim for that service in the first year of cover with onemedifund. If part of the annual limit has been used you will only be able to claim the remainder of the limit within the first year.
- The 6 month waiting period for health management programs is not transferrable between funds. This period must be served with onemedifund before benefits are payable.

Access Gap cover

The Access Gap scheme aims to reduce your out-of-pocket costs for doctors' bills while you're in hospital. If your doctor chooses to participate, you will have:

- No gap
- or
- Known gap – where you will be told your exact out-of-pocket costs before you are admitted to hospital

We have Access Gap arrangements with over 36,000 doctors across Australia, so remember to ask your doctor if they will participate.

Hospital substitution options

Our hospital substitution options allow you to recover where you're most comfortable – all you need is a referral from your treating doctor.

Hospital @ Home allows you to have services you would usually receive in hospital (like wound care or IV antibiotics) at home. If the healthcare services you need can be provided at home, you may be able to avoid a hospital stay altogether.

Rehab @ Home allows you to recover in the comfort of your own home with short term therapy for joint replacements, fractures, spinal conditions, stroke, respiratory conditions, cardiac conditions and mobility problems. We offer physiotherapy, occupational therapy and more.

Like all hospital services, there is a 12 month waiting period for pre-existing conditions for these options. See page 18 for more information.
